

CYEMPTIVE UMBRELLA FORTRESS

Know your Adversary. Every Move. Every Mask. Every Mile.

Introducing **Umbrella Fortress™**: the industry's first **global path track & trace platform** designed to reveal hidden adversary infrastructure operating across anonymized and obfuscated networks.

The platform analyzes **global internet routing behavior and metadata-only network patterns** without payload inspection, decryption, agents, or on-premise hardware. This architecture delivers unprecedented external threat visibility while maintaining full compliance with major regulatory frameworks

- **Near real-time adversary tracking**
- **Identify and block spyware**
- **DDOS countermeasures**
- **Early warnings of ransomware**
- **Insider data theft track & trace**

TRUST BY DESIGN:

Committed to the ethical use of Cyberspace.

Cyemptive's mission is to advance global cybersecurity through lawful, ethical, and sovereign defense. Our service model ensures that attribution-grade intelligence is delivered responsibly, securely, and only to those who need it.

VISIBILITY. ASSURANCE. CONTROL.

Purpose-built for government agencies and critical infrastructure operators, Umbrella Fortress enables organizations to detect pre-attack behaviors before disruptions impact power grids, transportation systems, financial networks, and healthcare delivery.

The future is here — and it's preemptive. Are you ready?
